Infinity

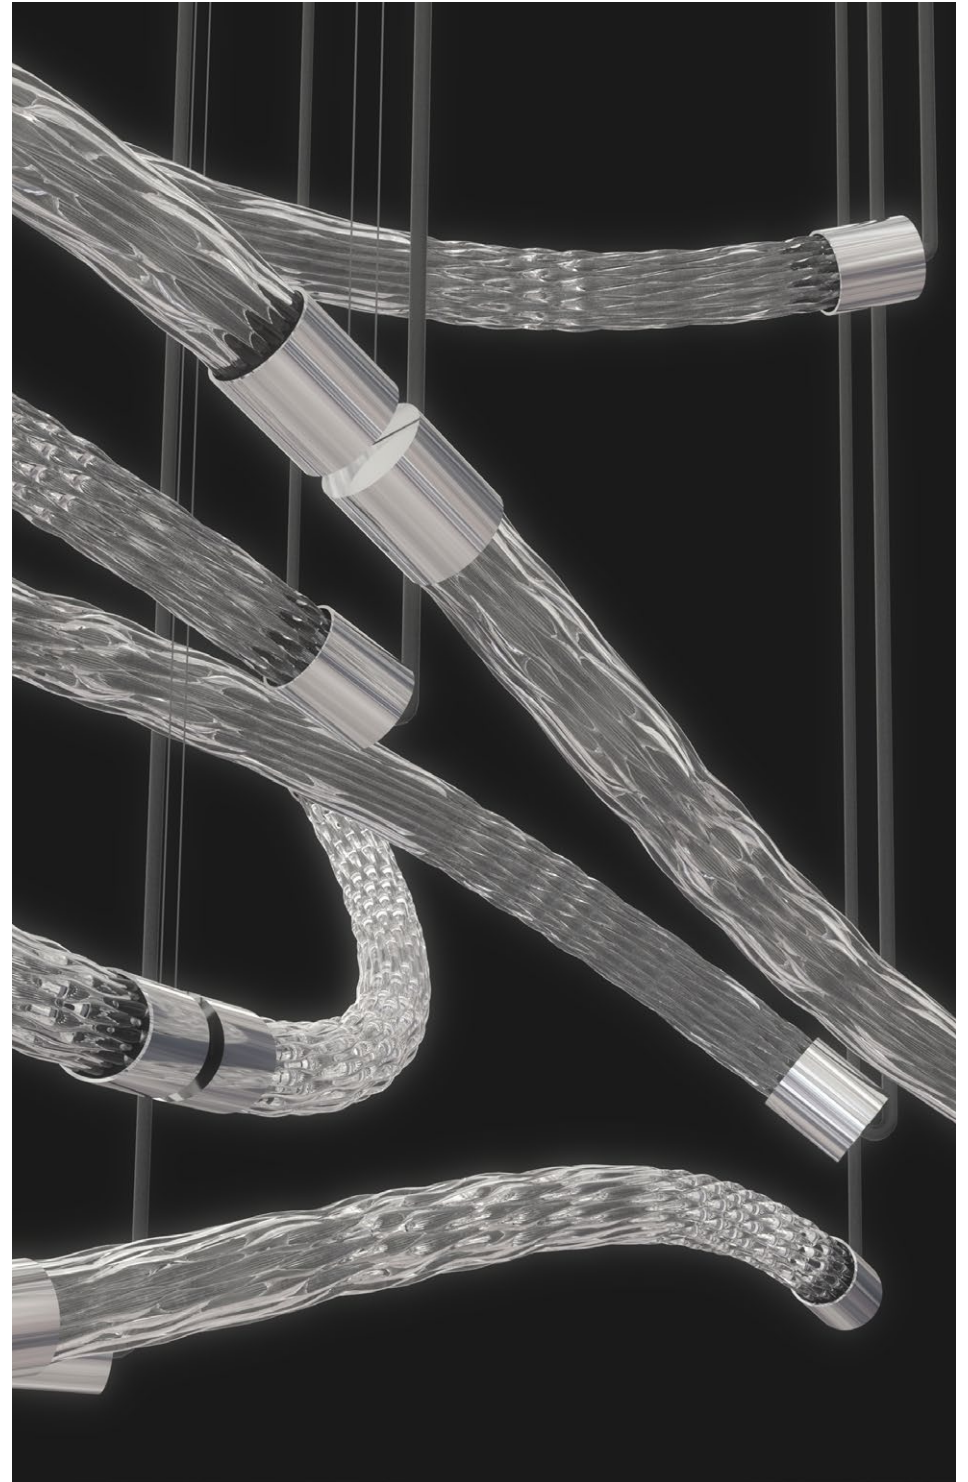

SANS  SOUCI

# INFINITY

---

This artwork represents an ode chanted to the infinite possibilities of merging traditional glassmaking techniques with modern technologies. The organic feel of crystal and its shaping permutations are perfectly matched by the pure forms of the metallic construction. The combination of optical fibers and LED chips offers endless avenues in terms of coloring and lighting. Infinity is thus suited for a myriad of compositions, especially the dynamic ones.

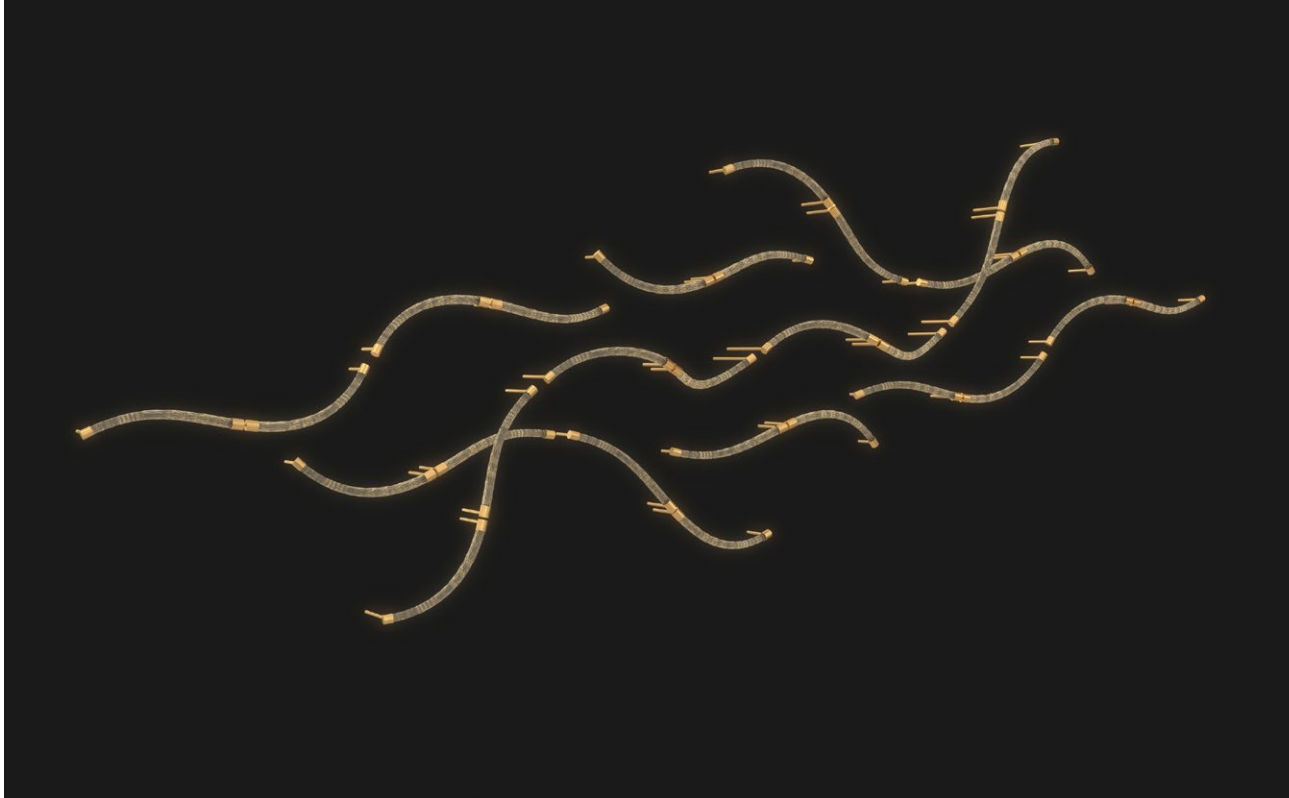

Design by Jiří Svoboda

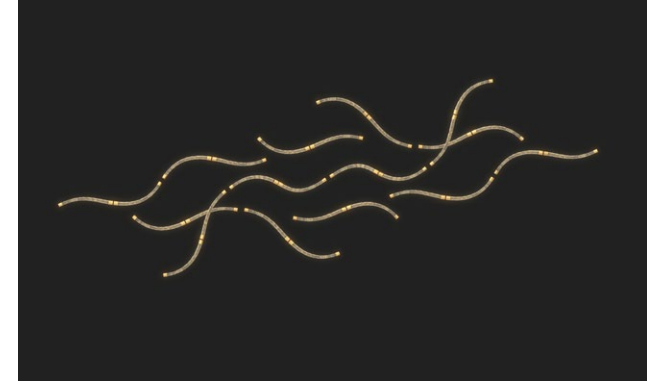

# OPTION 1
