

SANS  SOUCI

A collection of white and gold bowls hanging from thin wires against a dark blue background. The bowls are arranged in a dense, overlapping pattern, with some white bowls and many gold bowls. The gold bowls have a reflective surface that catches the light, creating bright highlights and reflections. The white bowls are more matte. The background is a solid, dark blue color.

# THE STORY ABOUT BOWLS

# BOWLS

The beauty of the light fixture centres on a simple shape and the ever-attractive contrast. The smooth hand-blown bowls were rotated ninety degrees and suspended with the convex parts facing one another. This created a wave that is very elegant yet also pleasantly disordered. The contrast is accentuated by an alternating application of colours and metallic coatings, including black and gold, white and rose gold and many others. Time and many installations proven the eternity of this beautiful component.
