Imagine the plant of mastered of craft so

Wel come

...to the cradle of glass-making to Bohemia where we are writing a Story of harmony between glass and light. A story that began many centuries ago and that keeps treading its charming path while offering new opportunities. Following the tradition and precious heritage of master glass-makers, we enrich it with new approaches, concepts, techniques and technologies that make it possible to push the limits beyond the seemingly impossible. Using fire and water, and combining craft and new technologies, our team of glass-making enthusiasts creates works that, besides being functional, are an embodiment of beauty, express values and are sources of unforgettable experiences.

... from crystal clear glass. Fascination by the fusion with light, and love of traditional craft are something we share. Our know-how combines many years of experience, a knowledge of traditional as well as new technologies, and an original approach to production. We are thrilled to carry out grand, unique projects focusing on light objects, exclusive light fixtures and luxury interior decoration features.

Graft.

... handed down with love from generation to generation, and production processes honed by years of experience form the basis of our work. Our glass-makers are able to create beautiful designer works from the batch, turning the ideas and concepts of our designers into final products. Besides traditional production methods, we put emphasis on unceasing innovation in both design and production, continuously developing new technologies for our original ideas.

Our projects

... Define your vision, wish or requirement and we will give it a specific dimension. We will create an individual, tailor-made solution directly for you interior. It does not matter whether it concerns low-key premises of a private residence, airy halls of luxury hotels, an eye-catcher in a shopping mall or light fixtures to set the desired mood in a restaurant. We lend a sense of firmness and luxury to traditional designs. Modern pieces, on the other hand, possess distinctive lightness and originality.

CONTEM PORARY LIGHT FIXTURES

... Imaginary limits are a challenge for us. Glass in its many forms enables us to develop and create the unimaginable. It is a living substance that has a tremendous potential for shapes, decorations and visual effects. It lets us express emotions, give form to a thought and turn a dream into reality. All this gives our light fixtures an expression that co-creates the personality of the target destination.

CLASSICAL LIGHT FIXTURES

... We honour tradition, yet we love progress. High-class crystal chandeliers that have retained popularity for not only decades, but centuries, play an irreplaceable role in our steady offer. However, not even classics can withstand the uncompromising influence of fashion trends. By reinventing traditional features, we create light fixtures that often teeter on the edge of modernism.

GLASS IN ARCHITEC TURE

... Glass adorns our interiors from the floor to the ceiling. We glam up marble floors, design decorative walls, top columns with glass heads, line staircases with unique railings or create glass fountains for quiet relaxation zones. The visual beauty of glass, its delicacy, timelessness and the endless possibilities for innovation support every interior on its journey towards a personal story.

Sans Souci, Company profile / Glass in architecture
